# GENERAL INFORMATION

**Thanks to our extensive range of standard colors, your patio cover will always fit in perfectly with the architecture that surrounds it. The powder coating of our aluminum profiles not only ensures our patio covers look aesthetically stunning in their various finishes; it also provides durable protection against outside influences. On top of that, Seaside Quality pre-treatment is applied to Renson products as standard.**

## Seaside Quality A

Seaside Quality A is a pre-treatment incorporated into the powder coating line in which a surface layer of at least 2 g/m<sup>2</sup> is removed before coating. This extra pre-treatment protects our aluminum profiles against the effects of aggressive environments, such as coastal or heavy industrial areas.

## Difference between Seaside Quality and pre-anodisation

Pre-anodisation is a pre-treatment that protects aluminum profiles against highly aggressive environments. Pre-anodisation takes place on a separate anodisation line, instead of directly on the powder coating line.

After pre-anodisation, the profiles must be handled very carefully and quickly processed on the powder-coating line. However, pre-anodised patio cover profiles cannot be powder-coated immediately without further processing. Doing so will compromise the quality of the pre-anodisation layer. This is why we do not offer this pre-treatment for our outdoor products. Seaside Quality A, however, always offers exceptional protection from aggressive environments.

## Coating finish

Depending on the desired appearance, there are 3 types of powder-coating finishes available.

- Textured coating
- Gloss [gloss level 70%]
- Matt [gloss level 30%]

## COLOR AND STYLE ADVICE

### Textured coating

Renson® recommends textured coating for your frame and columns to create an architectural, contemporary look. In addition, textured coating is less susceptible to scratching, and when it does get scratched, any marks are less easily visible.

**Tip:**

For ease of maintenance, blades can be powder-coated in either a matt or gloss finish. Always use the Renson® Maintenance Set to clean your cover effortlessly and safely.

### Bicolor

By having the blades powder-coated in a lighter color than the frame and columns, you can create a lighter and more open atmosphere underneath your patio cover. A light-colored louvered roof will reflect the heat of the sun much better and will allow much more light to enter the home in wall-mounted covers, for example, while dark-colored blades will absorb solar heat. A bicolor option is available at standard prices.

## Outdoor Top 20

We have brought together our most popular Outdoor colors in the Outdoor Top 20. This selection of standard colors reflects the latest color trends, making it easier for you to decide on your colors. The Outdoor Top 20 follows the evolution in color trends and may change from year to year.

## Wooddesign

**Create the natural warm appearance of wood, but with all the benefits and easy maintenance of aluminum. Wooddesign finishing is possible on the roof blades in our patio covers and on the blades in our aluminum Loggia panels.**

- Colorfast powder coating with wood grain texture
- Low maintenance
- Available in 3 designs:
  - White oak
  - Natural oak
  - Walnut
- Shine and color warranty: five years

### Applicable to:

- Aluminum Loggia Paro / Privacy blades \*
- Camargue \*\*
- Camargue Skye \*\*
- Algarve \*\*
- Aero \*\*
- Aero Skye \*\*

\* Not applicable to Loggia Plano blades.

\*\* Not applicable in combination with Lineo Luce [glass blades], Lineo Fix or Lineo Heat. The drips are powder coated in a uniform color according to the Wooddesign basic color [without wood grain texture]. The fixed blade/remainder filler will match the color of the frame and columns [Wooddesign not possible].
